City of Milwaukee Health Department Script for Auto-dialed Call to Childcare Facilities

The City of Milwaukee Health Department would like to update childcare facilities on the ongoing measles outbreak. Symptoms of measles include cold-like signs such as cough, runny nose, and high temperature. A red, blotchy rash will appear on the head and spread down the body. If any children in your facility exhibit these symptoms, they should be excluded while their immunization status is assessed. In addition, please review immunization status of all children and staff prior to registering them at the facility, and practice enforcement of required immunizations. For more information, visit our website at www.milwaukee.gov/health.
